i am a singer/songwriter in a unique style of electro retro.i have to date about 300 songs self penned and am an mp3 artiste.ive been successfull locally,and play guitar/bass/keyboards.i also produce my own material.ive many influences from marc bolan ,50s music to 90s music.i also like phil spectre sounds like glam and motown.i formed ricky fentone and the flat top cats as my first band in 1990 we used to play rock n roll covers everything from creedence clearwaterrevival,to beach boys to carl perkins ,eddie cochran,holly,johnny cash ,burnette,write through to later stuff.i have always had a large musical taste based on rhythm and blues,country,rock etc.as i grew towards songwriting i developed my own style,which is influenced by chuck berry amongst others.i also like buddy guy,bb king,bryan ferry,blondie,abba the list is endless,which gives me a unique style as i take a little from all i hear,could be blues ,pop or r n r.whatever i think youll like what you hear.thanks and enjoy
